

Graphic Designer Test

Time Limit: 2 Hours

Objective

Create 3 social media graphics announcing that Esferasoft Solutions now offers AI-powered software development services.

The target audience is founders and businesses looking for a reliable technology partner to build their products.

You may create:

- 3 standalone social media posts, or
- 1 carousel containing 3 slides

Your Task

Create a premium, professional instagram post for Esferasoft Solutions. Showcasing are services and work.

Requirements

- Create a clean and professional color palette.
- Select appropriate fonts and typography.
- Establish a consistent visual style across all 3 graphics.
- The design should feel premium, trustworthy, and technology-focused.
- Avoid cliché AI imagery such as:
 - Robot hands
 - Glowing brains
 - Circuit-board backgrounds
 - Generic humanoid robots
- Find a more creative way to communicate AI + software development.
- Include one short, strong line of copy per graphic.
- Copy should be written for founders, not as generic corporate marketing.
- Maintain strong hierarchy, spacing, alignment, and readability.
- Designs should be suitable for social media.

Important

You have a strict 2-hour limit.

We are evaluating your design fundamentals, creative thinking, visual hierarchy, typography, composition, consistency, and ability to create professional social media content within a limited timeframe.

You do not need to create a complete brand identity or spend excessive time developing custom illustrations.

What to Submit

1. 3 finished graphics in PNG or JPG format.
2. Optional: Link to the source file if readily available.
3. A 2–3 sentence explanation of your design direction.

Please mention briefly:

- Why you chose the colors
- Why you chose the typography
- How you approached the visual representation of AI

No extensive brand strategy or research document is required.
